

IEP Eligible Districts List

The Immigrant Education Program (IEP) grant requires at least 10 students who meet the IEP criteria as reported and collected in January. Once the enrollment is submitted, ISBE calculates the eligibility using the average of the previous two year's numbers. Only districts that report an increase of at least 3% or more are eligible for funds.

Additionally, districts need to indicate an intent to apply for these funds. The following list constitutes those districts that meet the eligibility criteria and that indicated intent to apply when they submitted the Ceiling Calculator in March.
