Hello,

I hope you are doing well today. I am a Research Assistant with The Brookings Institution where I am working with fellow, Elizabeth Kneebone and senior fellow, Alan Berube on their research on suburban poverty. As part of that research, we are looking into the allocation of anti-poverty federal funds across the Chicago metropolitan area. I am looking to find information on the 2012 Head Start and Early Head Start recipients (where they are and how much they received) for the Chicago region. Would it be possible for me to gain access to such information?

Thanks,
Peter
